CONTACT

EMAIL
aurabydaniyal@gmail.com

LOCATION
Lahore, Punjab, Pakistan

LINKEDIN
linkedin.com/in/aurabydaniyal

GITHUB
github.com/aurabydaniyal

TECHNICAL SKILLS

Programming
Python, JavaScript, TypeScript, C++, PHP, SQL, Java (fundamentals)

AI / GenAI
LLM integration, RAG, pretrained models, AI APIs, conversational AI, document Q&A

Computer Vision
YOLO, OpenCV, MediaPipe, OCR, hand landmark detection, image processing

Backend
FastAPI, Flask, Node.js, Express.js, REST APIs

Frontend
React, Next.js, HTML, CSS, Tailwind CSS, Bootstrap

Databases
PostgreSQL, MySQL, SQLite, MongoDB Atlas, Supabase, Firebase

Vector DBs
ChromaDB, pgvector

AI Tools
LangChain, LangGraph, LangSmith, Ollama, Hugging Face, n8n, MCP

Dev Tools
Git, GitHub, Docker, Android Studio, Vercel, Render

Also Familiar With
Some knowledge of ML/DL, Flutter and React Native

CERTIFICATIONS

AI-related certifications from **Anthropic** and **Google**

Muhammad Daniyal

AI Engineer | Computer Vision & AI Applications

PROFESSIONAL SUMMARY

Computer Science student at Superior University, Lahore, focused on AI engineering, computer vision applications, large language models (LLMs) and retrieval-augmented generation (RAG). Hands-on project experience building AI applications, integrating pretrained models and APIs, developing Python backends, working with vector databases and creating computer vision solutions. Completed a two-month AI Engineering internship at XBOT Labs in AI web development. Keen to build practical, user-focused AI products.

EXPERIENCE

AI Engineering Intern

Summer 2026 · 2 months

XBOT Labs · Faisal Town, Lahore, Pakistan

Gained professional experience in AI-focused web development during a two-month AI Engineering internship.

PROJECTS

AI Sign Language Reader

Python · Flask · MediaPipe · MySQL · Web Speech API · pyttsx3

- Built a computer vision app that recognizes sign-language gestures using MediaPipe hand landmarks and supports speech output.
- Worked with a 350+ phrase dataset and 30+ supported gestures; added text-to-speech and gesture-related features.
- Implemented Flask endpoints for prediction, text-to-gesture, history and analytics.
- Reported recognition accuracy of 93.2%.

Offline Multi-PDF RAG Chatbot

Python · LangChain · Ollama · ChromaDB · RAG

- Built a document question-answering app that answers questions from multiple PDFs using a RAG workflow.
- Used ChromaDB for vector retrieval and Ollama for local language-model execution, enabling a local-first, document-grounded workflow.

Hand VFX — InfinitySign Neon Aura

Computer Vision · Hand Tracking · Interactive Visual Effects

- Built a hand-controlled visual effects project centered on an infinity-sign neon aura concept.

Vision Lens — Real-Time Visual Translator

FastAPI · React · OCR · YOLO · LLMs · Translation

- Developing a mobile-first app to help users understand foreign-language signs, billboards, ads and documents.
- Designing live-camera OCR with translated overlays, YOLO-based object selection, multilingual translation and a conversational AI assistant.

EDUCATION

BS Computer Science

Expected 2028

Superior University · Lahore, Pakistan

CAREER FOCUS

Seeking entry-level roles in **AI Engineering & AI application development**, **Generative AI & RAG development**, **junior computer vision**, **Python backend development** and **full-stack AI development**.
